

Construction Notice

Issued on:
November 8

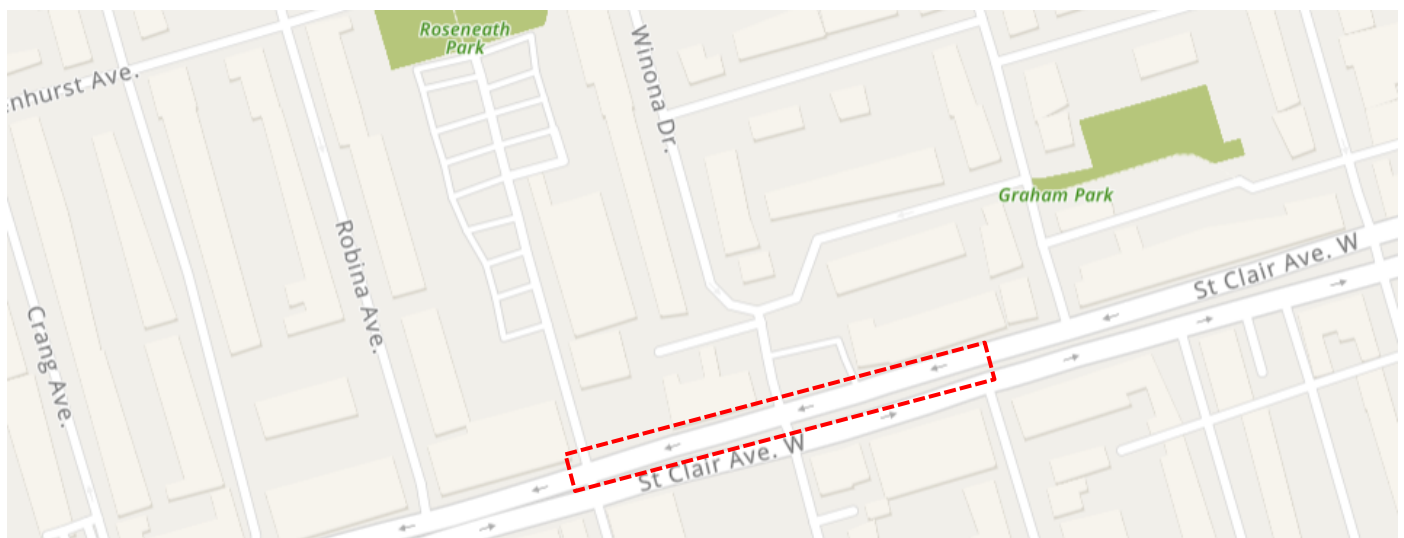

St Clair Ave W and Winona Ave westbound streetcar stop rail replacement Starting as early as November 9 – November 16*

Timeline: As early as November 9 – November 16

*Content / timeline accurate at time of printing

What we are doing and why?

TTC will be conducting repairs at St Clair Ave and Winona Ave (westbound) for streetcar stop rail replacement commencing as early as November 9. Work is expected to last approximately one week. This replacement of worn rail is critical for safe and reliable operation of the system. Work will take place on a 24/7 basis during the course of this project to ensure effective quality of rail installation.

What to expect

- Work will be conducted 24 hours, however, all excavation will take place during the day and afternoon shift.
- Some noise, dust and, vibration associated with construction is unavoidable. Efforts will be made to minimize.

Traffic, pedestrian and cyclist impacts

- All work will be contained within the right-of-way. No lane closures are required.
- Access to the station and transit service will be maintained.
- No sidewalk detours are required.

Thank you for your patience as we work to improve transit in Toronto.
