

# The TTC's Revenue Protection Strategy Audit and Risk Management Committee

February 11, 2019

# ■ | Agenda

- • The TTC's Revenue Protection Strategy
  - Preparation Work in 2019
- • Ensuring Fare Payment Equipment is Available and Reliable
- • Revenue Control and Data Analytics
  - – 2019 Ridership and Revenue
  - – Presto Adoption
  - – Stop Sell Impact
  - – Analysis and Insights
  - – Child Concession Card Insights

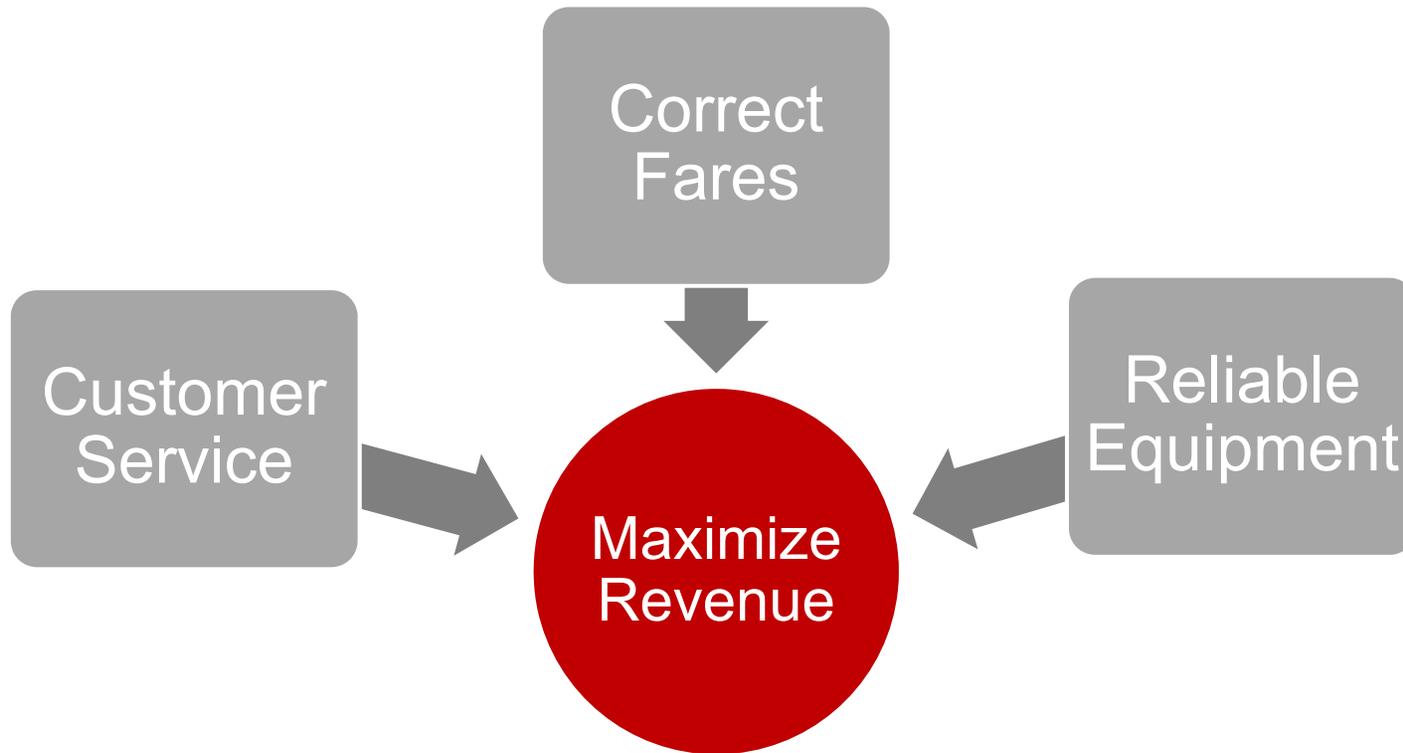

# The TTC's Revenue Protection Strategy

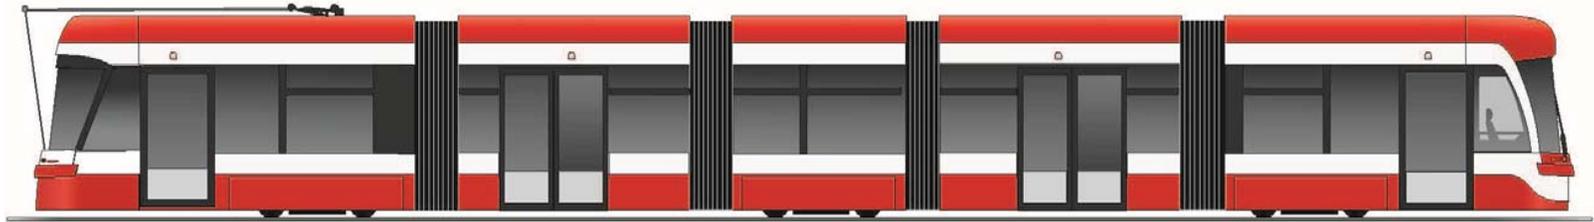

# Revenue Protection Objective

Maximize revenue

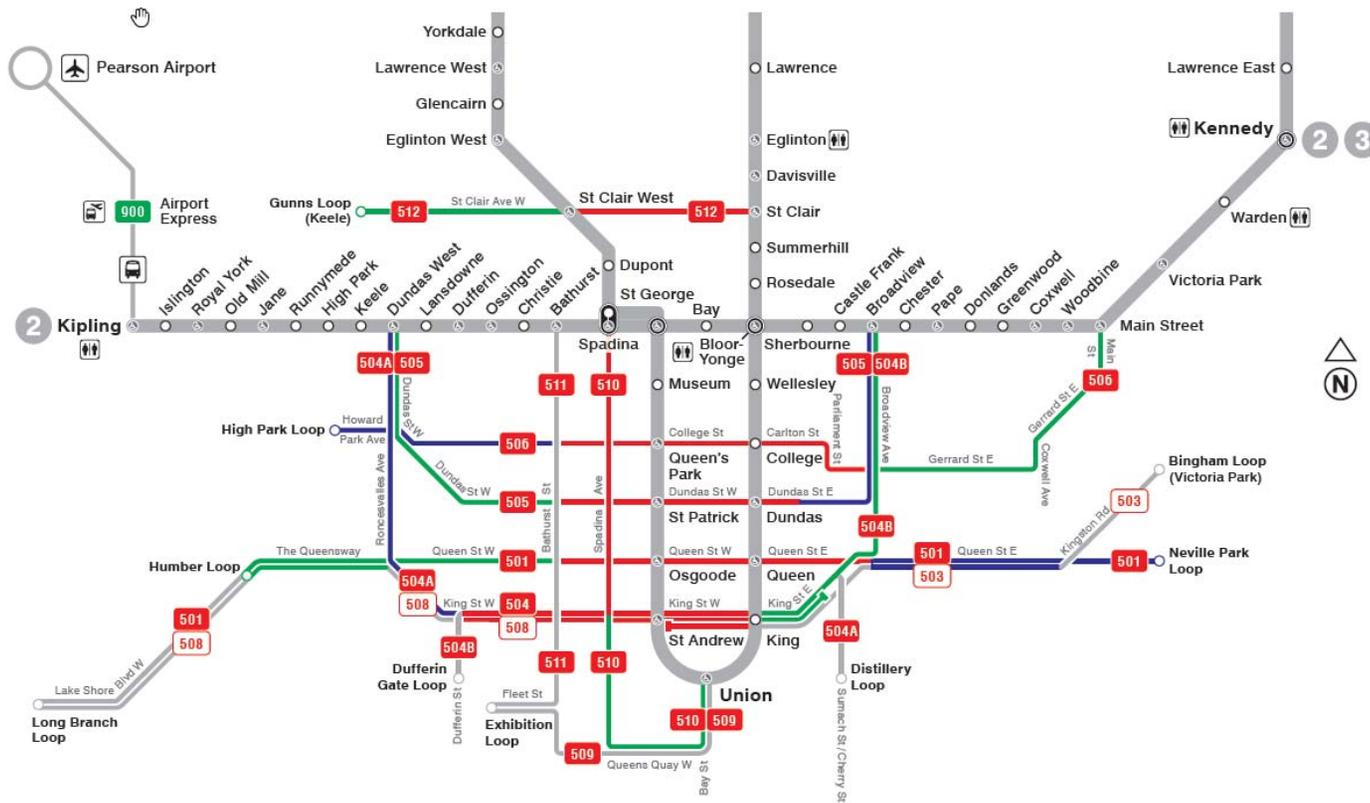

## ■ Streetcar Deployment Tactics

- Consistent resource assignment
- ‘Crush load’ inspection
- ‘U-Turn’ customer inspection
- Offboarding inspection
- Zone assignment
- Proportional network coverage

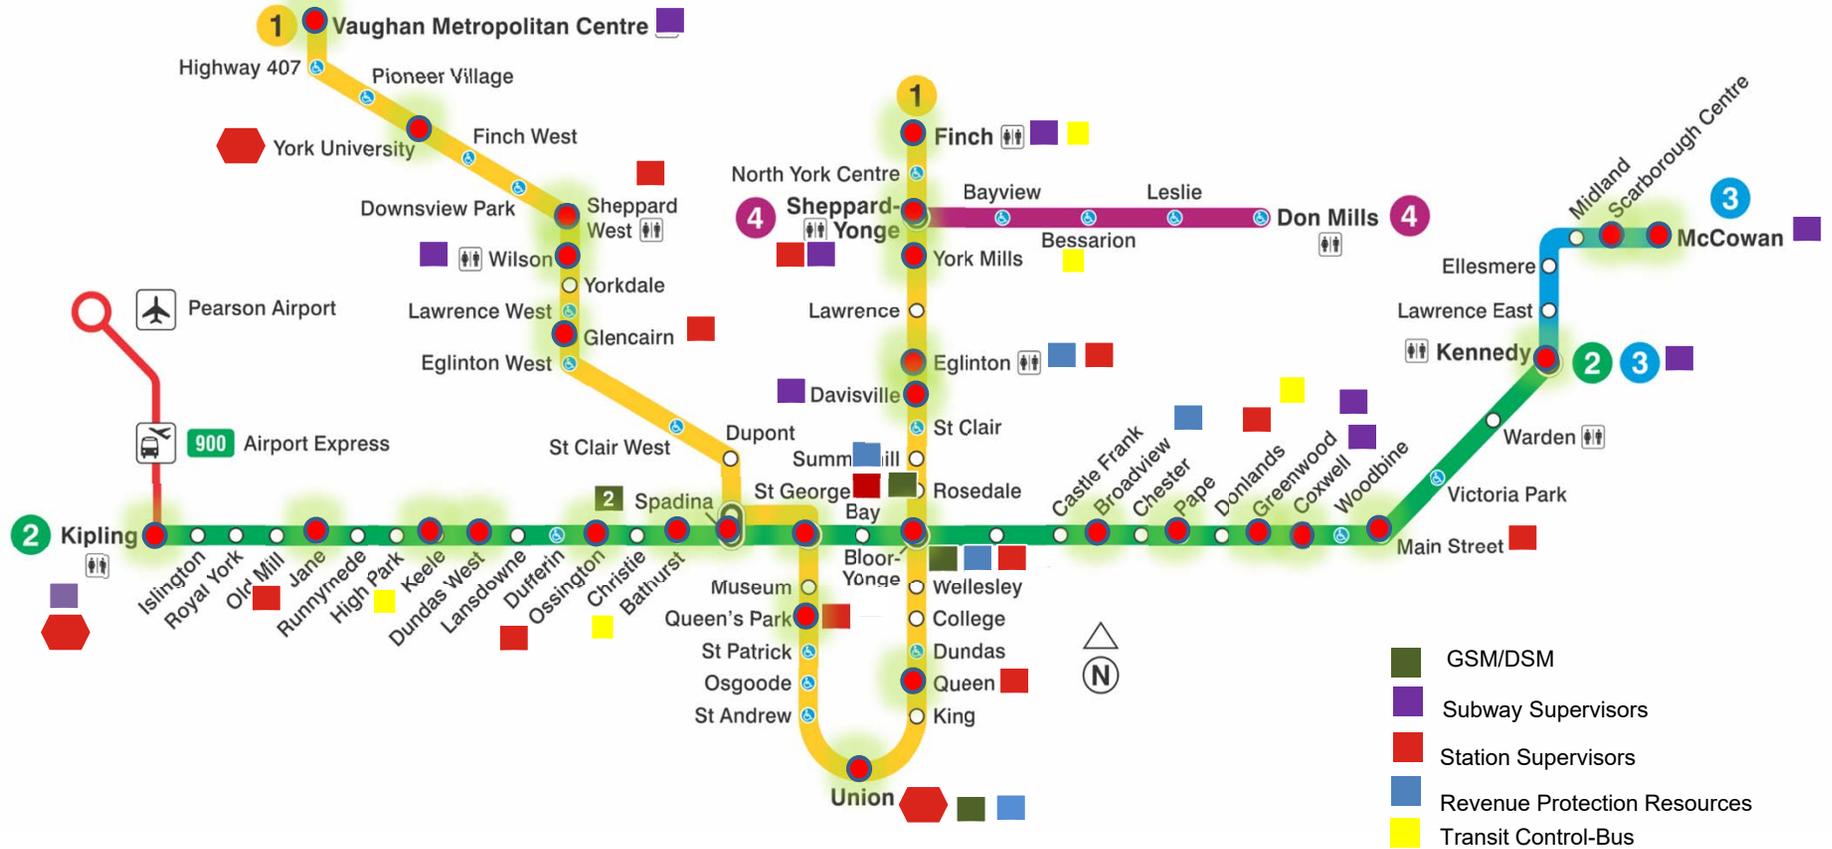

# Streetcar Deployment Tactics

## Zone coverage map

# Stations Coverage Peak Post AM

# Reducing Fareline Permeability – ‘Locking’ Farelines

Barriers installed between farelines and collector booths to decrease opportunity for station access without payment

Fare Evasion Deterrence  
Proof of Concept

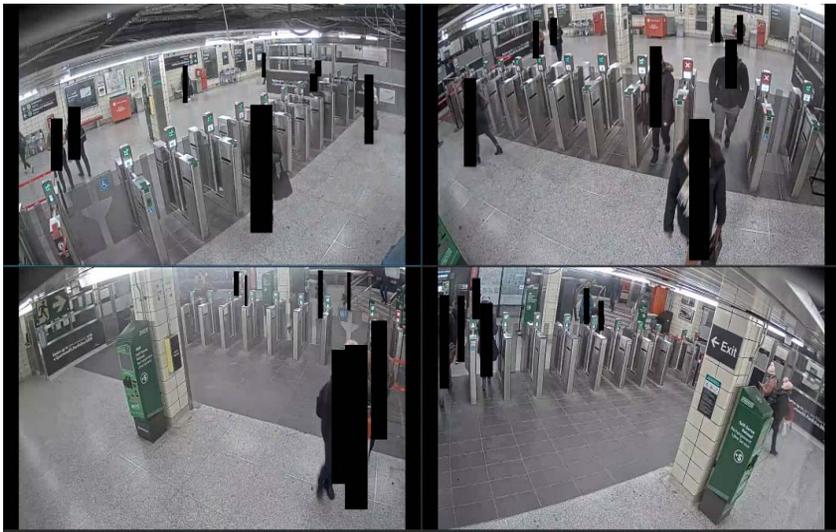

Improvements to faregate function and first line maintenance

# Improving Visibility and Security in Stations

Pilot 360 degree view camera and new video management system

Sample View 1 Yonge/Bloor

Sample View 2 Yonge/Bloor

# Customer Communication Positive 'tap every time' Culture

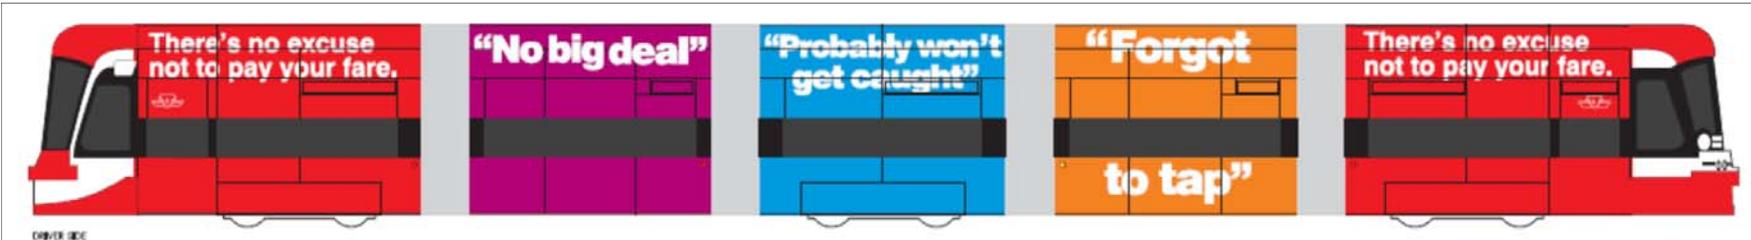

## Tap every time

You must tap your PRESTO card or PRESTO Ticket every time, even if you pay your fare as-you-go, or have a monthly pass loaded on your card.

## **Ensuring Fare Payment Equipment is Available and Reliable**

# Reliable Fare Payment Equipment - PRESTO

## Three Phase Approach

### 1) Incident Management:

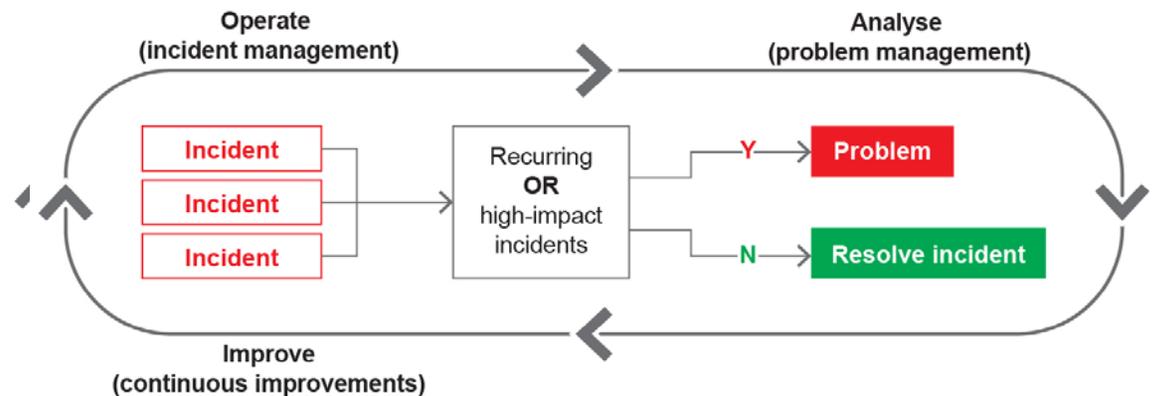

- Unplanned interruption to a service **or** reduction in the quality of a service
- Restore normal service operation as quickly as possible

### 2) Problem Management:

- Address recurrence of incidents

### 3) Continuous Improvement:

- On going program with Metrolinx
- Q4 2019 activities focused on process enhancements and stabilization

# ■ | Reliable Fare Payment Equipment

## Q4 2019 Improvements

- Equipment performance is based on:
  - Device functionality
  - Device maintenance/cash collection service
- Changes implemented in Q4 2019
  - Ongoing improvement program
  - Address specific AG recommendations

Improvements to daily operations/services

Increased remote and real-time monitoring

Availability reporting using real-time data

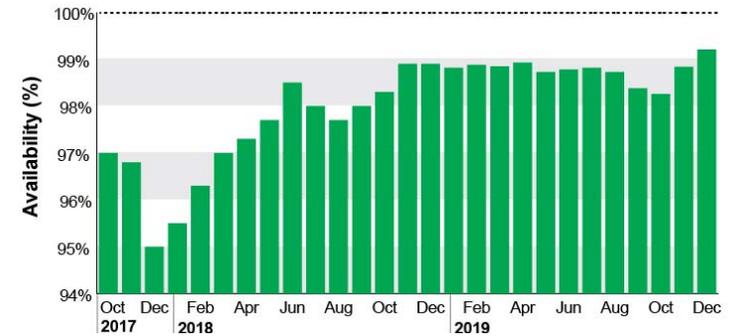

Improvements to device functionality (hardware/software)

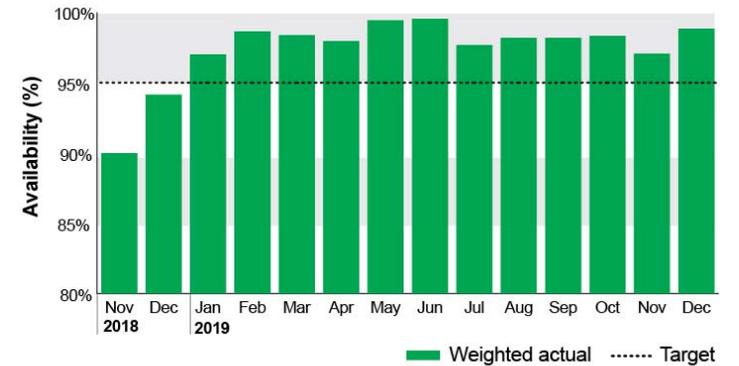

# PRESTO in Streetcars

- Fare and Transfer Machines (FTM) and card readers
- Add cash collection and maintenance at third designated location
- Remote monitoring and remote device recovery
- Daily device audits by Staff prior to start of service
- Improved process to make vehicles available for PRESTO maintenance and cash collection
- Enhanced reporting/analytics
- Cash Collection
  - Trigger alerts for cash vault collection set at 75% volume
  - Increased cash collection locations in designated facilities
  - Ad hoc cash collection services

**PRESTO card readers**

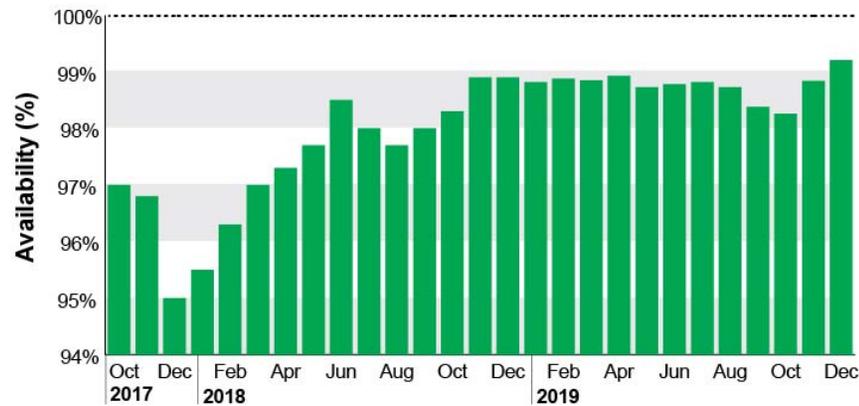

**Fare Transfer Machines**

# PRESTO on Bus

- Remote monitoring and remote device recovery
- Daily audits of PRESTO card readers prior to start of service
- Enhanced reporting/analytics

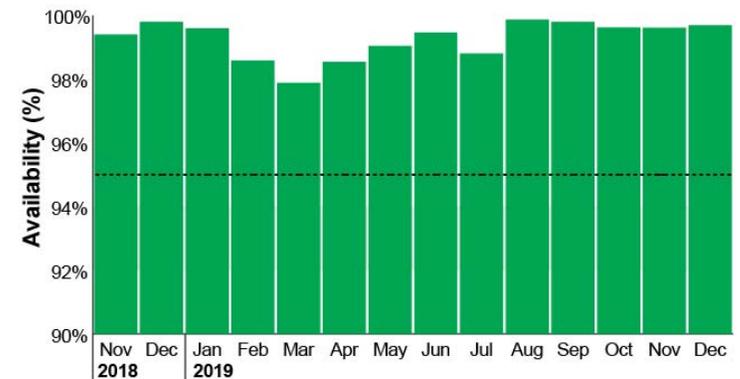

**PRESTO card readers**

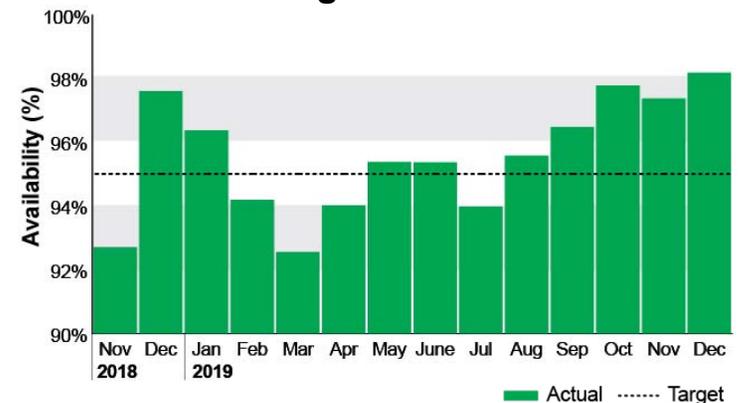

# PRESTO in Stations

- Fare Vending Machines (FVM) and Self Serve Reload Machines (SSRM)
- New bank note acceptor hardware
- New SSRM software to address screen freezing
- Remote monitoring and remote device recovery
- Improve escalation process
- Use of device statistics for coordinating cash collection & maintenance
- Ad-hoc cash collection
- Enhanced reporting/analytics

### Self-serve Reload Machines

### Fare Vending Machines

# Revenue Control & Data Analytics Insights

## ■ | Key Activities

### Revenue Control

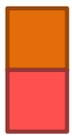

- Budgeting & Forecasting
- Revenue Accounting
- Financial Controls
- PRESTO Liaison

### Data Analytics

- Ridership Forecasting
- System Usage Reporting
- Organization-Wide Analytics Support
- Business Intelligence Solutions

# TTC 2019 Ridership & Revenue Results

Ridership

**525.5 M**

System Wide

Revenue

**\$1.184 B\***

Earned  
(1% below budget)

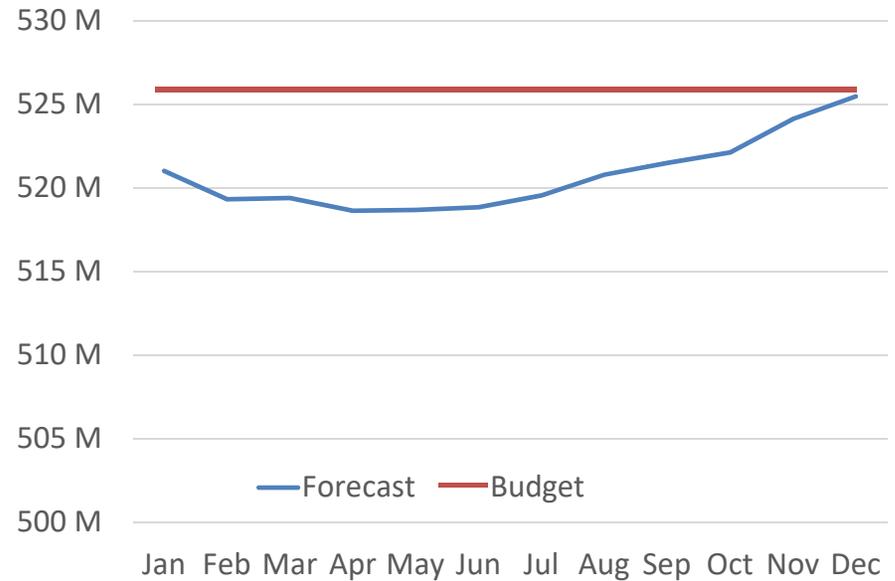

PRESTO

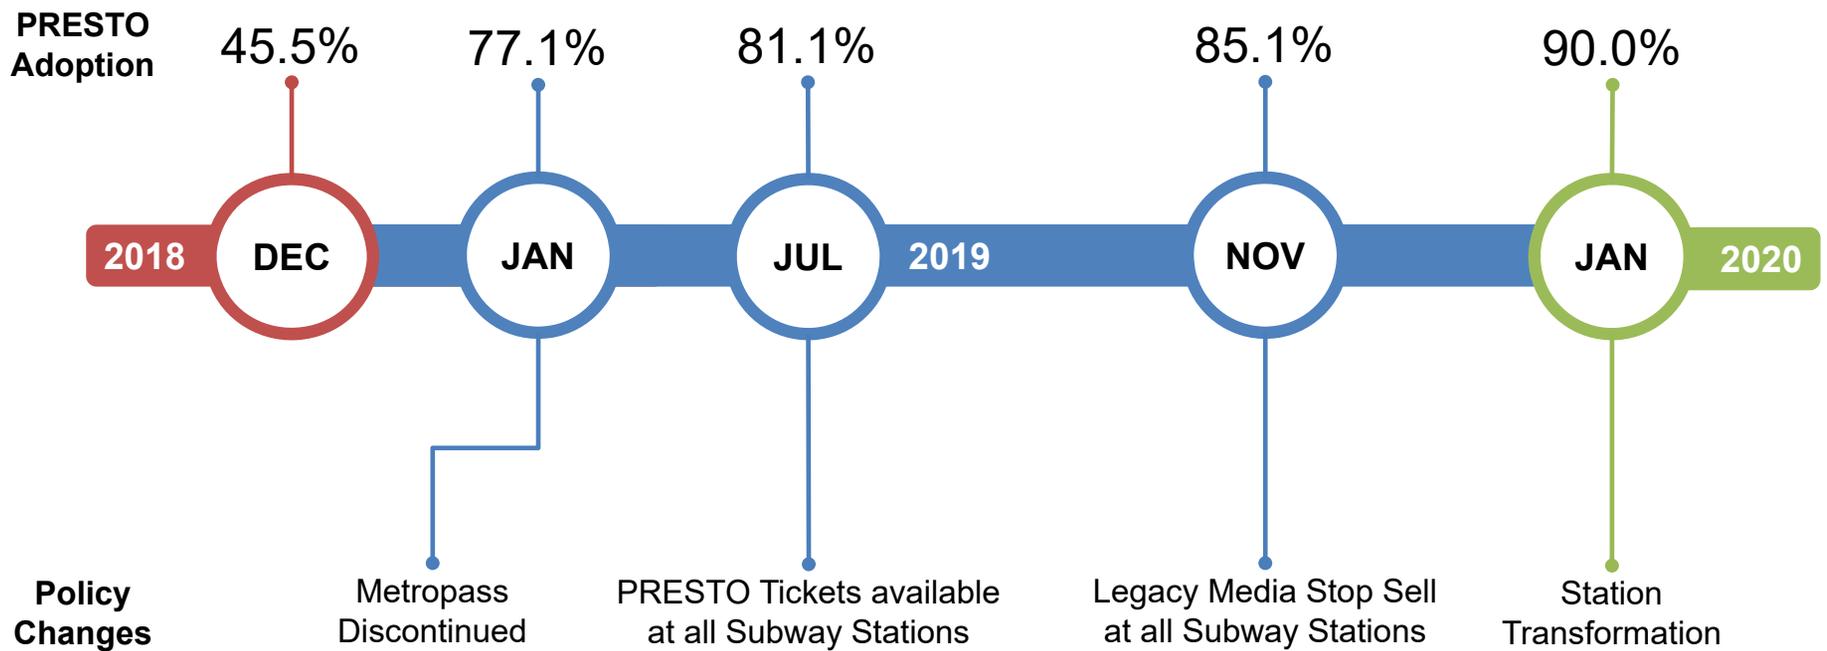

**86.8%**

Revenue from PRESTO  
(Up from 45% Dec 2018)

## 2019 Ridership Trend

# PRESTO Adoption Has Doubled

# PRESTO Adoption Enhances Analytics Capabilities

## 2018

---

 Lack historical data

 ~ 0.5 M daily taps

## 2019

---

 Build-up of data

 > 1.2 M daily taps

 More granular, timely and varied data

## 2020

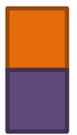

---

 More robust benchmarking and budgeting

 Enhance analytical relevance

 More evidence-based decision making

# PRESTO Data Analytics Building Blocks

## Event

Determine the impact of policy changes and/or events

## Mode

Accurately measure ridership and revenue by mode

## Route

Evaluate ridership to inform service improvement along and among routes

## Concession

Understand our customers to make more informed policy decisions

## Time

Monitor system usage by time to improve service deployment

## Location

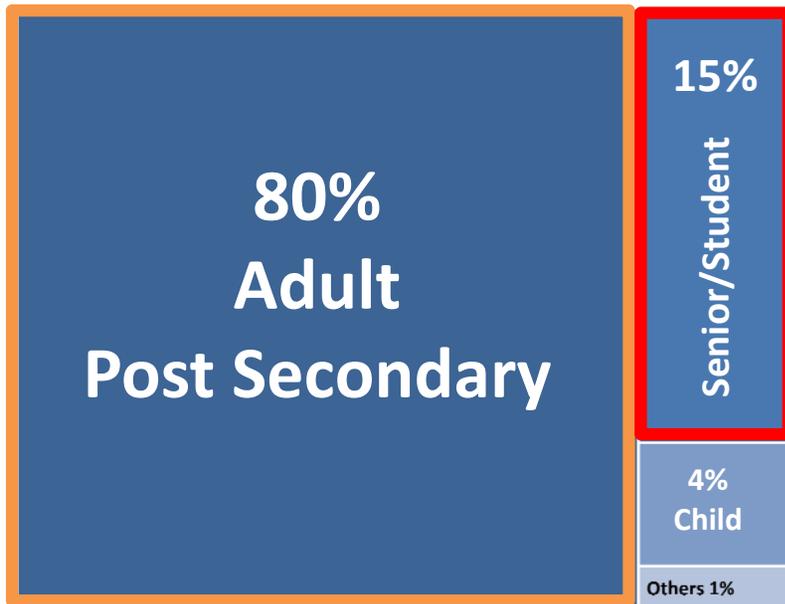

Leverage improved location data to inform revenue protection deployment

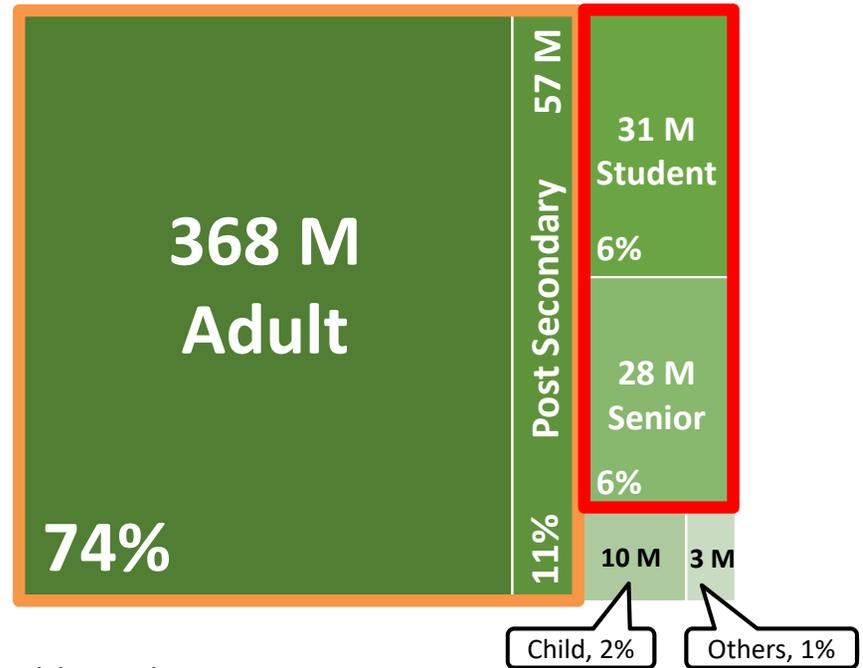

# Concession Profile: Legacy Media vs PRESTO

## Legacy Media

## PRESTO Data

Move from sampled Legacy Media data to more accessible and precise PRESTO data allows for more detailed analysis.

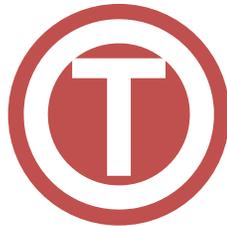

# Event Analysis: Legacy Media Stop Sell Impact

+75%

**Child card growth is faster than overall growth**

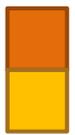

# Child PRESTO: Top 10 Locations in 2019

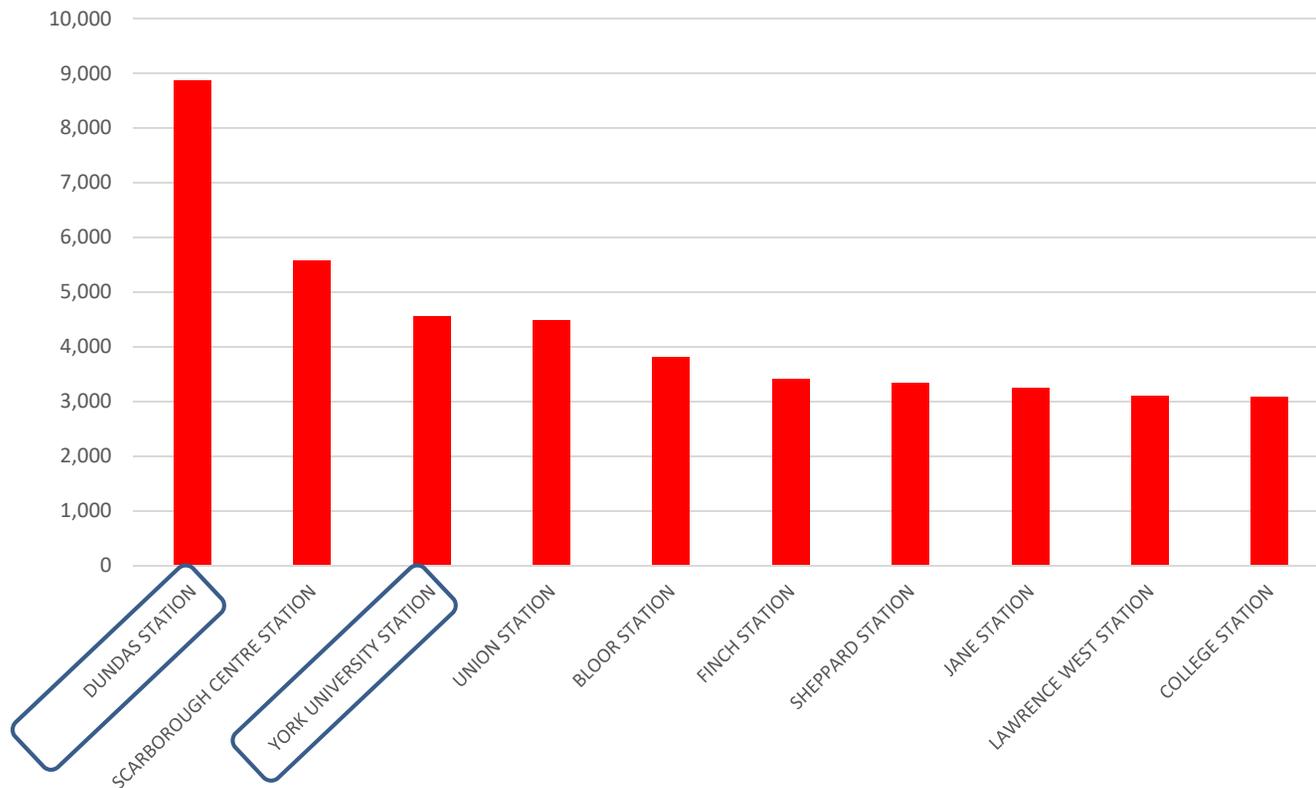

All top 10 locations for child card usage are **Subway Stations**.

**#1 Dundas Station**

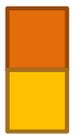

## Child PRESTO: Top 10 Locations (Jan 5 – 25)

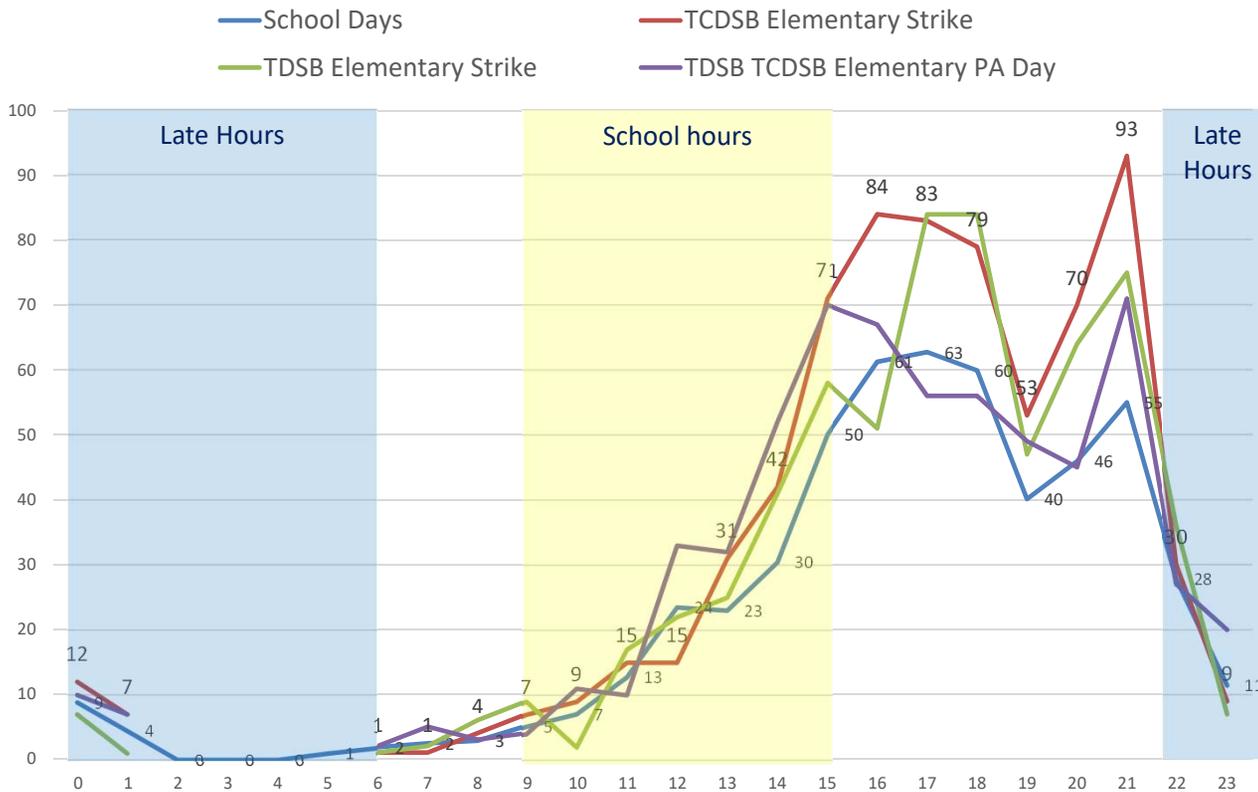

- First 3 work/school weeks in 2020
- Selected for analysis to include
  - 1 PA Day (Jan 17)
  - 2 Strike Days (Jan 20, 21)
- Similarly, all top 10 locations for child card usage in 2019 are **Subway Stations**.

**#1 Dundas Station**

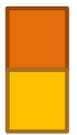

# Child PRESTO: Dundas Station Usage by Hour (Jan 5 – 25)

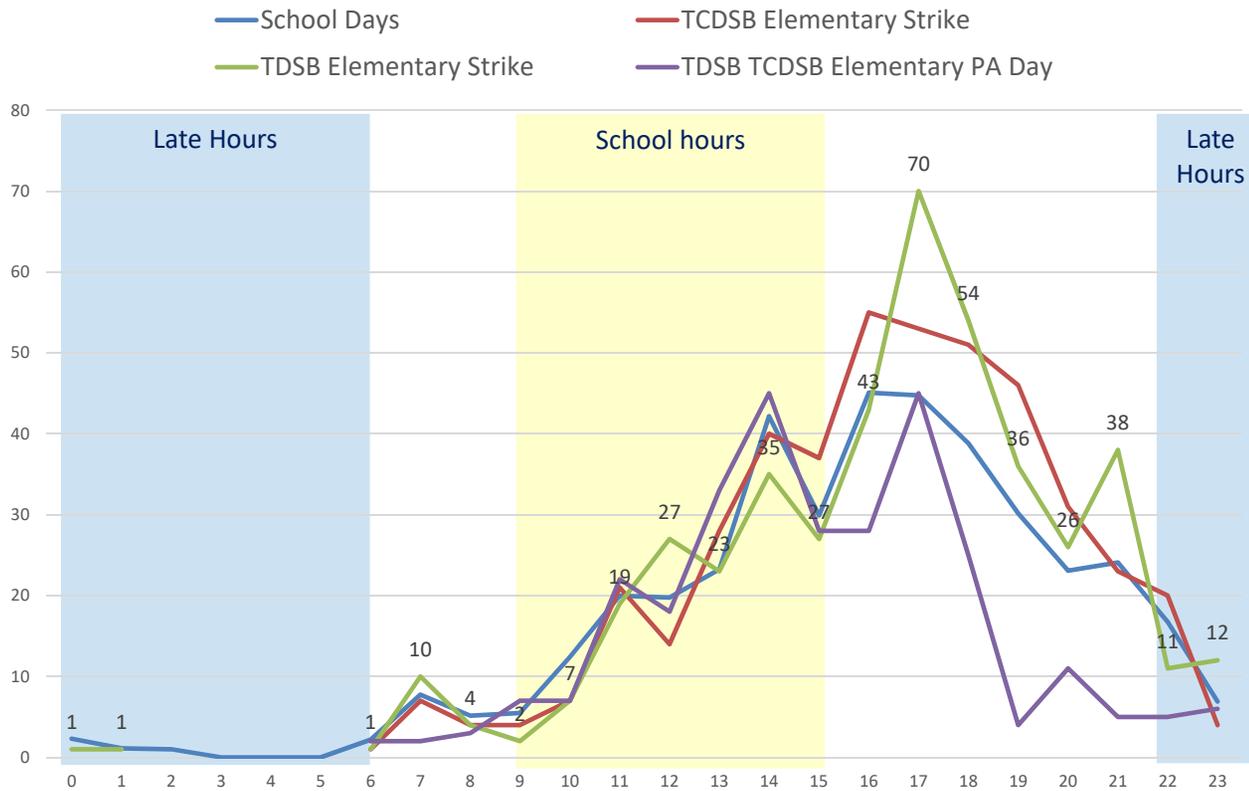

- Dundas station not likely used by children ages 0 – 12 who attend nearby schools.
- Higher usage on school closure days. 
- Similar time of day usage patterns between regular school days and school closure days.  vs 
- Travel during late hours and school hours are not expected for child ages 0 – 12.
- Data shows potential misuse of child cards at Dundas Station.

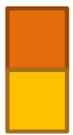

# Child PRESTO: York University Station Usage by Hour (Jan 5 – 25)

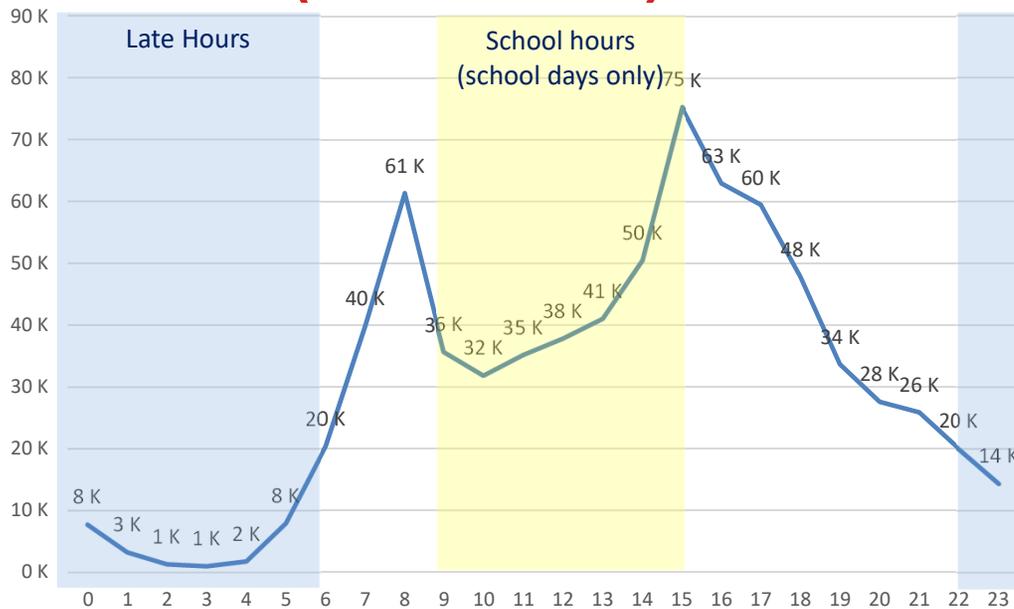

- York University station not likely used by children ages 0 – 12 who attend nearby schools.
- Similar time of day usage patterns between regular school days and school closure days.  vs   
- Travel during late hours and school hours are not expected for children ages 0 – 12.
- Data shows potential misuse of child card at York University Station.

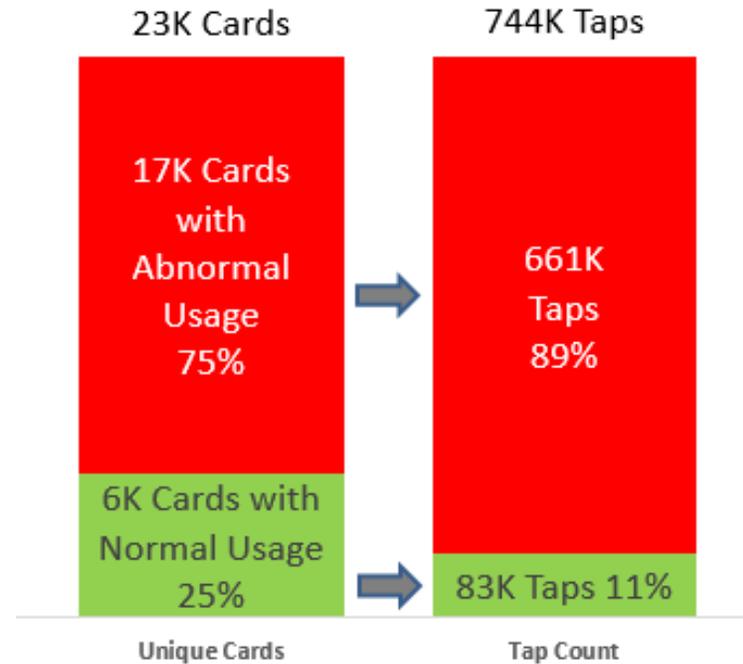

# Child PRESTO: Percentage of Abnormal Usage by Time (Jan 5 – 25)

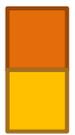

Travel during late hours and school hours were observed across the network. These trips are considered abnormal for children ages 0 – 12.

- 17,000 child card were used during abnormal hours. These cards generated 89% of the total taps.
- 6,000 child cards have expected (normal) usage.

## Child PRESTO: 2019 Potential Revenue Loss

Potential Misuse

89%

89%  
Misused

- If misuse ratio is representative of child card usage in 2019

5.5M Rides

- 89% x 6.2M PRESTO child ride
- 5.5M misused child rides in 2019

\$12.4M

- Average fare \$2.25
- Potential Loss \$12.4M
