

The Board at its meeting of August 19, 2014 adopted the recommendation in the Notice of Motion, as follows:

“Whereas a berm exists on the east side of Allen Road from about Kennard Avenue in the north to just north of Sheppard Avenue in the south;

Whereas the University-Subway line and its supporting equipment run in part under this berm;

Whereas the berm represents a unique opportunity to connect existing walk ways and lane ways along the Allen Road; and

Whereas, an elevated walk way or path would provide safe and easy access to the Downsview Subway Station.

Therefore, be it resolved that TTC CEO in conjunction with the General Manager, Parks, Forestry and Recreation provide to the TTC Board of Commissioners a briefing note that would include but not be restricted to:

1. The opportunities that present itself in creating an elevated walkway or path on the berm referred to above.
2. If restrictions or problems exist, recommendations for remediation.
3. Any alternatives or ideas that can leverage this essential north-south walking corridor”.
