

Councillor Joe Mihevc
Toronto City Hall
St. Paul's West
Ward 21

MEMO

TO: Toronto Transit Commission
FROM: Commissioner Joe Mihevc
RE: King Street Transit Transformation
DATE: January 20, 2016

Recommendation:

Request the Chief Planner to do a presentation to the TTC Commission as soon as possible on the work program for the King Street Transformation Project. This presentation would include key milestones and possible transit, cycling, and place-making deliverables.

Background:

The King Street streetcar is one of the TTC's busiest routes. However, it suffers terrible inefficiency because of the conflicts with motorized vehicles. The time has come for the TTC to develop a pilot to test a right-of-way for its vehicles, especially as the new vehicles are put into revenue service.

The Planning Department is undertaking a work program entitled "The King Street Transformation Project." It is important for the TTC Commission to understand the work as it just may produce very positive benefits to the TTC.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Joe Mihevc'.
