

Notice of Motion

Feasibility of Adding Leslie Street Stop to 953 Steeles East Express

Moved by: **Commissioner** Shelley Carroll

Seconded by: **Commissioner** Brad Bradford

Summary

The 953 Steeles East Express bus route is a key line, providing connectivity to thousands of residents of both Toronto and Markham on a daily basis. Currently, Leslie Street is the only major arterial road that does not have a stop on this route, despite a growing population and an increasing amount of institutional and commercial activity.

We are requesting that an assessment be undertaken on the feasibility of adding an additional stop at Leslie Street and that the results, including ridership levels, be presented to the Board at a future meeting.

Recommendation

1. The TTC Board request that the Chief Executive Officer report back to the Board on the feasibility of adding a stop at Leslie Street to the 953 Steeles East Express, including a breakdown of the relevant ridership numbers.

Date: April 2, 2019
