Notice of Report: Seasonal Prohibition on Lithium-Ion Battery Powered E-Bikes and E-Scooters

Date: December 3, 2024

To: TTC Board

From: Chief People and Culture Officer

Chief Safety Officer

Chief Strategy and Customer Experience Officer

Summary

At its meeting on October 29, 2024, the TTC Board referred the report titled Seasonal Prohibition on Lithium-Ion Battery Powered E-Bikes and E-Scooters to the TTC's Racial Equity Office and directed staff to complete an equity impact review for consideration by the TTC Board at the Board's next meeting. Such review should assess potential impacts that a ban of lithium-ion-powered micromobility devices, including e-bikes and e-scooters, may have on equity deserving groups and gig workers with recommendations for impact mitigation developed in consultation with TTC Safety staff and Toronto Fire Services.

A report responding to the Board's request will be submitted to the December 3, 2024 TTC Board meeting.
