

Future of the Transport Bus Initiative – Winter 2024/2025

TTC Board Decision

The TTC Board on October 29, 2024, adopted the following:

That the TTC Board:

1. Approve the use of buses for transport only when the temperature reaches -15 Celsius and not as a warming solution for individuals using the transit system for shelter during the 2024/2025 winter season.
2. Request the City of Toronto Shelter and Support Services to continue to actively search for additional warming centre opportunities to reduce dependence on the TTC transit network for shelter during the 2024/2025 winter season.
3. Direct the Commission to recover costs from the City of Toronto for special buses provided for people waiting or direct transport of people to shelters.
