

## **Notice of Motion**

### **Automated Streetcar Cameras**

**Moved by: Commissioner Josh Matlow**

**Seconded by: Commissioner Chris Moise**

#### **Recommendation**

---

That the TTC Board:

1. Approve automated ticketing enforcement for motorists that fail to stop for open streetcar doors, and report back to the October TTC Board meeting with implementation plan.

#### **Summary**

---

The failure of vehicles to stop for pedestrians entering and exiting TTC streetcars is a serious and ongoing issue, exemplified by a recent incident where a rider was hit by a car that failed to stop on September 8, 2024. This issue is difficult to enforce without automation given the scale of streetcar service and frequency of stops.

Despite the TTC streetcars running with active external cameras since 2019, the TTC has not proceeded with automated camera enforcement for motorists who fail to stop for open streetcar doors. This motion directs TTC staff to approve automated ticketing enforcement for motorists that fail to stop for open streetcar doors, and report back to the October TTC Board meeting with implementation plan, in order to keep transit users safe from drivers who fail to follow the rules.
